

WCEAM

World Congress on
Engineering Asset Management

2ND ANNOUNCEMENT AND PRELIMINARY PROGRAMME

Keep and Grow Value!

10th World Congress on Engineering Asset Management

Tampere, Finland
28th – 30th of September 2015

INVITATION

The 10th World Congress on Engineering Asset Management (WCEAM2015) takes place in September 2015 in Tampere, Finland. The Congress is hosted by Tampere University of Technology (www.tut.fi) and VTT Technical Research Centre of Finland (www.vtt.fi) and supported by The International Society of Engineering Asset Management (www.iseam.org).

Engineering asset management encompasses all types of engineered assets from infrastructure and equipment to software systems across industry and public sectors. The congress will focus on all aspects of engineering asset management from strategic level issues to detail level machine health issues. Congress topics will include discussion about industry and public sector issues as well as academic research.

The 10th WCEAM 2015 will provide you an opportunity to interact with over 250 delegates from around the world. We look forward to seeing you in Tampere in September 2015.

Professor Kari T. Koskinen

*Tampere University of Technology,
Mechanical Engineering and Industrial Systems
Chairman of WCEAM 2015*

ACCOMPANYING PERSON PROGRAMME

For companions of the delegates there is programme during the scientific sessions. Accompanying person programme has a fee of 105,40 € which is paid with the conference registration fee.

The first World Congress on Engineering Asset Management (WCEAM) was held in Brisbane Australia in 2006. The annual congress is an important forum for exchange of information on recent advances in this growing field of research and practical solutions. The annual congress has contributed significantly to the fact that engineering asset management has matured into a professional practice. The 10th WCEAM congress slogan **"Keep and Grow value"** emphasizes that considerations on asset life cycle and economic value are an important part of overall engineering asset management.
